

(The following Windows setup guide is for your reference, this computer system doesn't include Windows OS.)

To turn on your computer for the first time, follow the steps below:

1. Turn on the monitor and any other peripheral devices connected to your computer.
2. Press the power button on the front panel of your computer.
3. Select the desired language from the menu (German, French or Italian).
4. Windows starts automatically in the selected language. Click "Next" to continue.

5. In the License Agreement window, read the contents, click "I accept the Agreement", and then click "next".

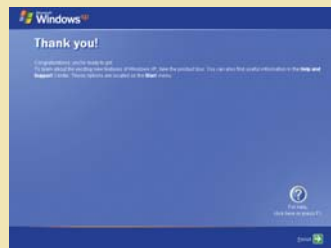

6. In the Product Key window, type the Product Key in the fields and then click "Next". The Product Key sticker is placed on top of your computer.

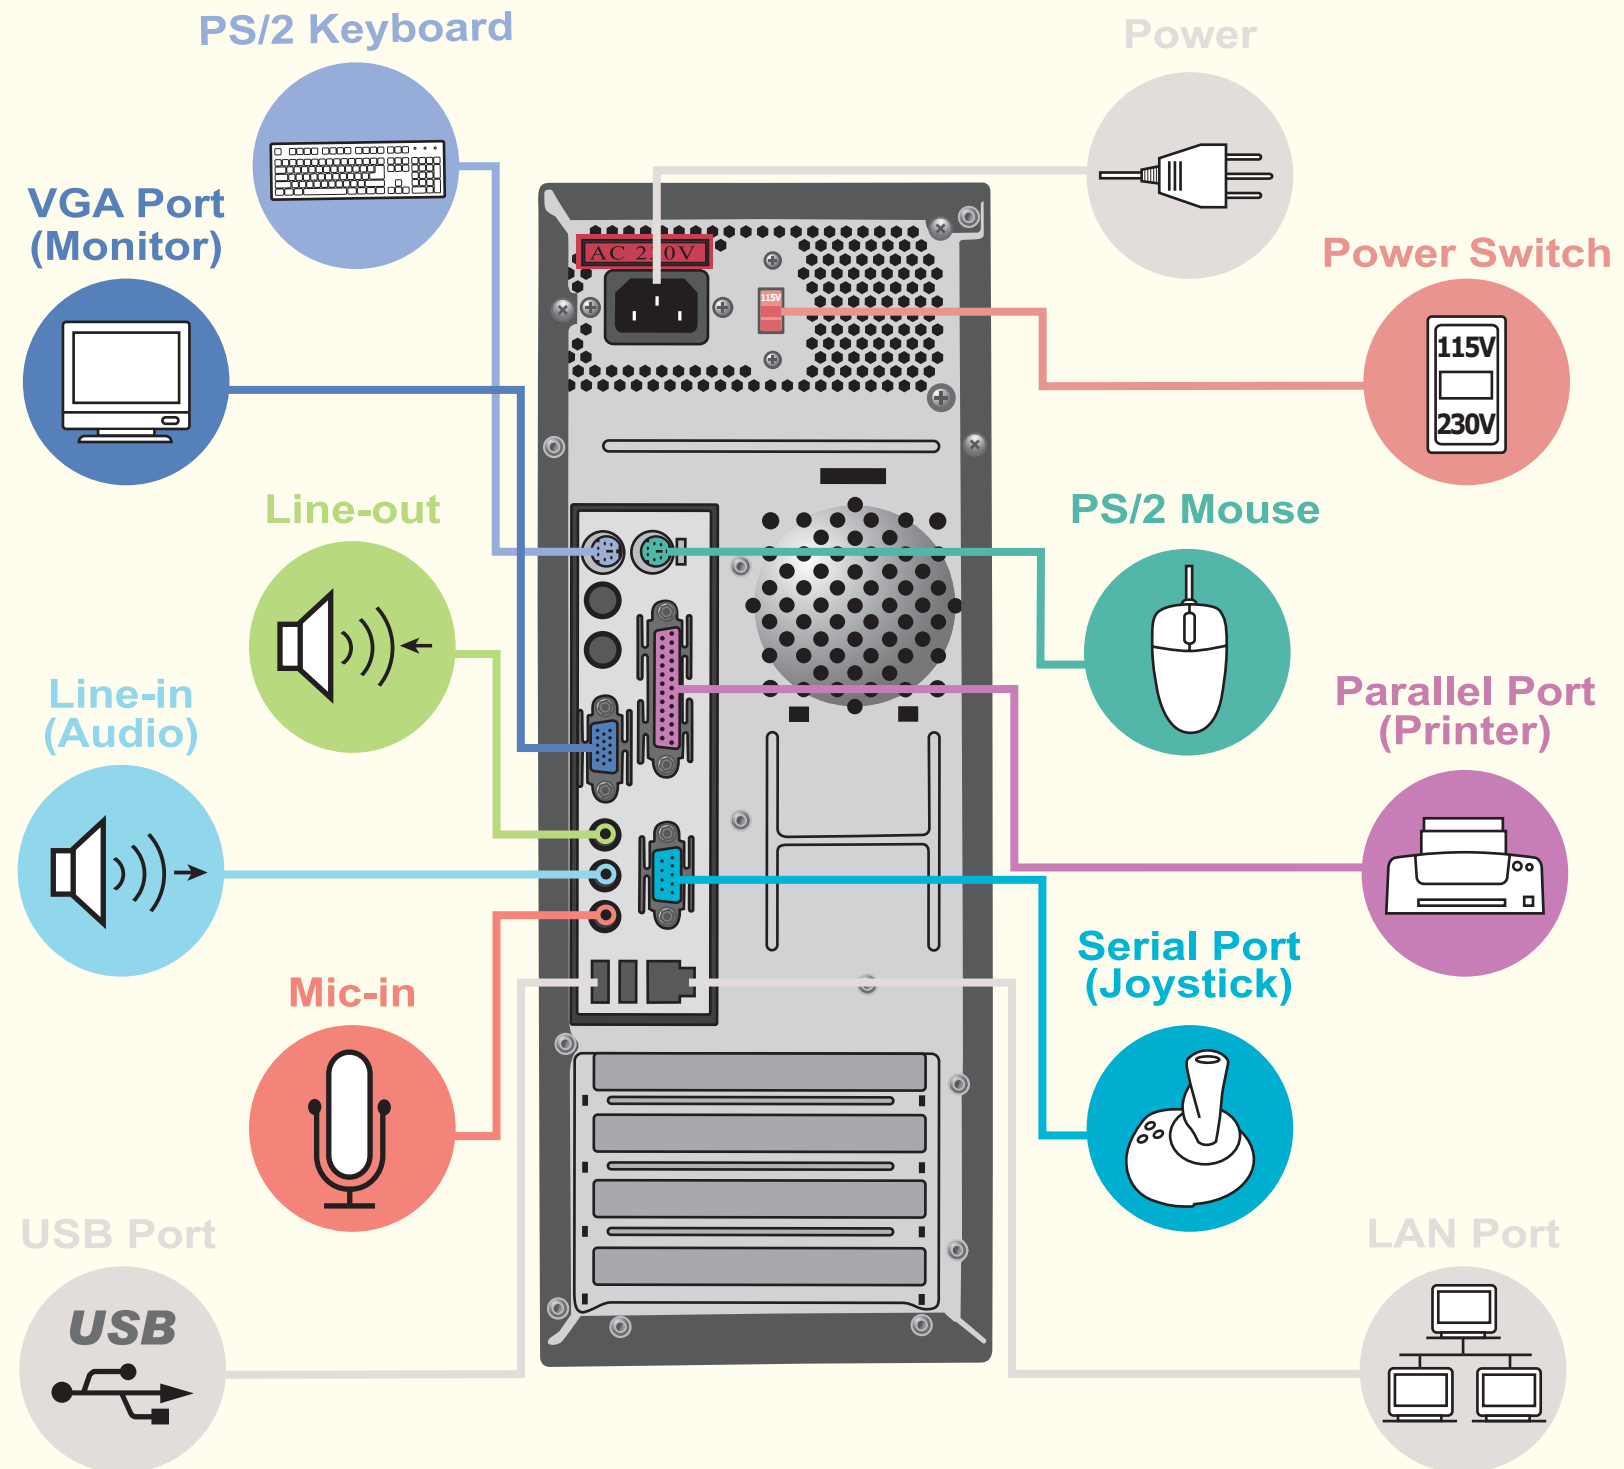

7. Choose whether you wish to register with Microsoft (optional) and then click "Next". If registering with Microsoft type in your appropriate details and then click "Next".

8. When the Start Wizard window is displayed, click "Finish".

PC1 Quick Setup Guide

Empowered Connectivity Initiative

Packaging contents:

- computer system

- keyboard
- PS/2 mouse
- speakers
- driver CD

Quick Set up Guide:

The installation guide explains how to install and set up your computer.

User's manual:

This booklet provides more detailed information about your computer system.

Note: The packaging does not include other peripheral devices (e.g. monitor and printer).

Warning: Failure to set up a safe and comfortable workstation or misuse of your PC will shorten the life of your PC and can even lead to personal injury. To reduce the risk of electrical shock, make sure that your PC is completely shut down and that the PC is connected only to a grounded outlet, before connecting any external devices.
